

# Get an overview.

**You know your machine extremely well. But together we can get to know it even better and establish a basis for optimisation. For example, we can unlock performance potential and identify weak points or risks.**

**One of the first steps is to take an inventory. We gain an overview for you, showing which drive components are installed where and what opportunities there are for procuring replacement parts. This can reduce the risk of unscheduled machine downtime and the associated expenses.**

## Highlights

- Detailed overview of the drive technology installed
- Process of procuring replacement parts is simplified
- Faster response time when servicing is required
- Lower costs and less unscheduled downtime
- Creates the basis for customised, further-reaching service concepts, e.g.:
  - Machine analysis
  - Stock concepts or plans

# Inventory

Service module inspection

## What we offer for you

- A professional inventory of the drive components, e.g. controls, inverters, gearbox and motors.
- A detailed list of components for the drive technology installed, compiled for you by our team of Lenze experts
- Information about the delivery capacity for the installed Lenze drive components and successor products
- On-site visual assessment and status classification by a Lenze Service team

Machine data				
<b>Name</b>	Conveyor	<b>Operation</b>	Triple-layer 5 days per week	
<b>Year of manufacture/IBN</b>	2005	<b>Operating hours</b>	approx.66,000 hours (Calculation: 24 hrs x 5 days x 50 weeks x 11 years)	
<b>Manufacturer</b>	Machine manufacturer	<b>Controller mains times</b>	max. 53,000 hours	
<b>System output</b>	...unknown...	<b>Controller operating time</b>	max. 44,400 hours	

Axes					Availability	Product life cycle	Delivery time/d	Express production 3 days	Emergency service 24 hours
<b>+ AW01</b>	<b>Conveyor drive 01</b>	<b>Company Lenze</b>	<b>Company For example</b>						
	Electronics Type: E84AVSCE2224SX0-XXXXX	Mat. No. 15518667	KD Mat. Lenze_43659874		yes	0	3	-	-
