

Training the easy way.

1

Developing ideas

Are you looking to build the best machine possible and already have some initial ideas? Then get these down on paper together with us, starting with small innovative details and stretching all the way to completely new machines. Working together, we will develop an intelligent and sustainable concept that is perfectly aligned with your specific requirements.

2

Drafting concepts

We see welcome challenges in your machine tasks, supporting you with our comprehensive expertise and providing valuable concepts for your innovations. Here, we take a holistic view of the individual motion and control functions and draw up consistent, end-to-end drive and automation solutions for you – keeping everything as easy as possible and as extensive as necessary.

Training that gives you freedom.

We are with you in all 5 phases of your engineering process, helping you to create the perfect solution for your machine tasks. This gives you enough freedom for what is most important: your ideas. To assist you, we also offer you a wide range of training courses, giving you a chance to get to know our products, drive solutions and automation systems. Add our expertise to your experience, and make your working days more effective, safer, and one thing above all: easy.

3

Implementing solutions

Our easy formula for satisfied customers is to establish an active partnership with fast decision making processes and an individually tailored offer. We have been using this easy principle to meet the ever more specialised customer requirements in the field of machine building for many years.

4

Manufacturing machines

Functional diversity in perfect harmony: as one of the few full-range providers in the market, we can provide you with precisely those products that you actually need for any machine task – no more and no less. Our L-force product portfolio, a consistent platform for implementing drive and automation tasks, is invaluable in this regard.

5

Ensuring productivity

Productivity, reliability and new performance peaks on a daily basis – these are our key success factors for your machine. After delivery, we offer you cleverly devised service concepts to ensure continued safe operation. The primary focus here is on technical support, based on the excellent application expertise of our highly-skilled and knowledgeable after-sales team.

The right
training
for any task.

The benefits for you:

Time savings

Every second counts, so learn about what you can achieve with our portfolio in short, module-type seminars. They will enable you to focus on the thing that is really important: how to implement your project quickly and efficiently.

Variety

Always the right kind of training: our very diverse range of seminars is geared towards your engineering process.

Expertise

Hands-on learning experience: all our courses are practical, application-based and taught by experienced trainers. You will find it easy to integrate what you learn into your day-to-day work, straight away.

Proximity

Take part in the training you need when it suits you best: we offer our courses in many locations in Europe, all year round. This keeps you flexible in terms of both time and place.

Start-up training

- Design engineer
- Project planner
- Application engineer
- Programmer

The ideal choice right from the start: our one-day start-up training courses give you a quick and very practical introduction to what our products, solutions and systems can do for you. Knowing this will make it easy for you to make the best choices when you implement your machine concept.

Commissioning and application training

- Design engineer
- Project planner
- Application engineer
- Programmer
- Commissioning engineer

Getting your machine operating quickly: technical expertise is essential for successfully implementing your ideas. In our commissioning and application training for systems you will get to know our products and software in more detail – for seamless application and smooth operation.

Service training

- Maintenance engineer
- Commissioning engineer

Safeguarding operation in the long term: our service training will equip you with the practical knowledge you need for reliable machine diagnostics and rapid troubleshooting. And for the worst-case scenario, you will learn how to replace faulty elements quickly and make your machine ready for operation once again.
