

Press release

Lenze UK, Bedford, 12th July 2019.

Lenze to showcase Smart Motor Solutions at this year's IMHX exhibition.

Celebrating 50 years in the UK, Lenze, will showcase at IMHX this September, their Smart Motor Solutions - a complete, scalable mechatronic drive system, combining motor, gear unit and electronic drive in one incredibly easy-to-use package.

In addition, Lenze's latest X4 Remote with x500, an out-of-the-box solution for cloud-based remote services and condition monitoring, will also be available at their stand. The X4 platform integrates with their x500 IoT gateways, so that customers can bring both machines and systems into the cloud without specific IoT knowledge.

Neil Beaumont, Marketing Manager at Lenze says: "We are constantly looking at offering more freedom for engineers and look forward to demonstrating the X4 platform at IMHX where visitors can drop by for a coffee to discuss the considerable benefits this solution provides. From remote access over VPN to the storage of machine data in the cloud, there's much more for a system integrator to discover."

He adds: "We are consistently among the top choice for system integrators and OEMs offering specialist knowledge in intralogistics, packaging, textiles and converting and printing. IMHX is one of the best exhibitions in the country and this is the perfect opportunity to demonstrate our many design and engineering solutions."

Visit **Stand 20C125** on the 24-27th September, NEC Birmingham for coffee and a chat with Lenze regarding automated solutions.

About Lenze

Lenze is a leading automation company for the machine-building industry and a specialist in Motion Centric Automation. As a systems supplier with solutions competence, Lenze works for and with its customers to create high-quality mechatronic products and packages, powerful systems consisting of hardware and software for machine automation, as well as digitalisation services in areas such as big data management, cloud or mobile solutions, and software for the Internet of Things (IoT).

Lenze employs around 3,700 employees worldwide and is represented in more than 60 countries. Lenze's growth strategy will see the company continuing to invest strongly in the areas relating to Industry 4.0 in the coming years – with the aim of increasing sales revenue and profitability.
