

# Training the easy way

The right training for any task

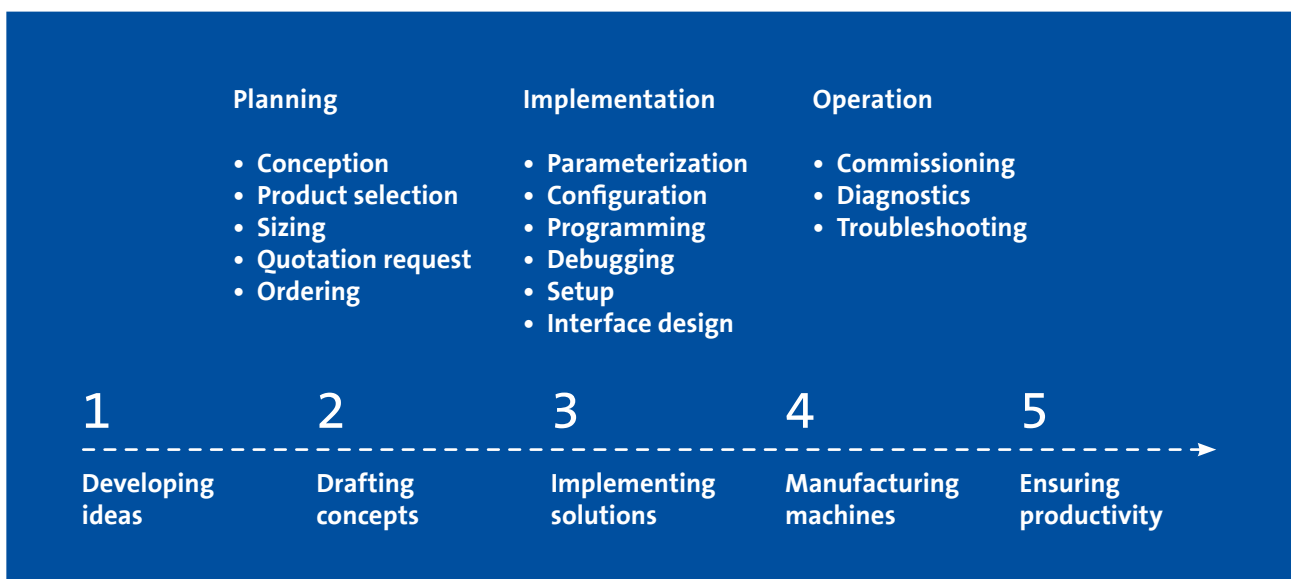

As easy as that.

**Lenze**

# Training that gives you freedom

We are with you in all 5 phases of your engineering process, helping you to create the perfect solution for your machine tasks. This gives you enough freedom for what is most important: your ideas. To assist you, we also offer you a wide range of training courses, giving you a chance to get to know our products, drive solutions and automation systems. Add our expertise to your experience, and make your working days more effective, safer, and one thing above all: easy.

# The right training for any task

## Start-up training for the planning phase

- Design engineer
- Project planner
- Application engineer
- Programmer

The ideal choice right from the start: our one-day start-up training courses give you a quick and very practical introduction to what our products, solutions and systems can do for you. Knowing this will make it easy for you to make the best choices when you implement your machine concept.

Please note:  
Start-up training is offered on demand only.

## Commissioning and application training for the implementation phase

- Design engineer
- Project planner
- Application engineer
- Programmer
- Commissioning engineer

Getting your machine operating quickly: technical expertise is essential for successfully implementing your ideas. In our commissioning and application training for systems you will get to know our products and software in more detail – for seamless application and smooth operation.

## Service training for the operation phase

- Maintenance engineer
- Commissioning engineer

Safeguarding operation in the long term: our service training will equip you with the practical knowledge you need for reliable machine diagnostics and rapid troubleshooting. And for the worst-case scenario, you will learn how to replace faulty elements quickly and make your machine ready for operation once again.

# The benefits for you

## Time savings

Every second counts, so learn about what you can achieve with our portfolio in short, module-type seminars. They will enable you to focus on the thing that is really important: how to implement your project quickly and efficiently.

## Expertise

Hands-on learning experience: all our courses are practical, application-based and taught by experienced trainers. You will find it easy to integrate what you learn into your day-to-day work, straight away.

## Even more flexibility thanks to online training courses and video tutorials

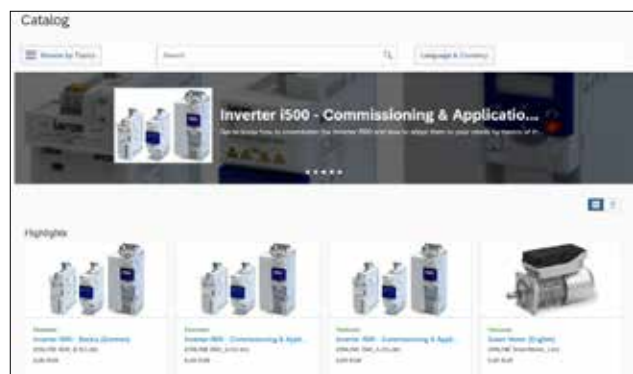

As a supplement to our on-site training programs, we also offer online training courses and video tutorials covering topics from the field of automation and drive technology.

## Variety

Always the right kind of training: our very diverse range of seminars is geared towards your engineering process.

## Proximity

Take part in the training you need when it suits you best: we offer our courses in many locations in Europe, all year round. This keeps you flexible in terms of both time and place.
